(54) Title: COMBINATION CARRY BAG

(57) **Abstract:** The invention is a mat device (10) having a first (11) and second surface (12) which, in an open orientation, includes a generally elongate portion (20) which is adapted to engage with a removable fabric mat (30) on the first surface, the mat device further includes side storage portions (40) having pocket devices (41) for item storage which, in this open orientation, extend laterally from and at least partially along the lengthwise sides of the elongate portion, the arrangement being such that the mat device can be folded and fastened in a closed orientation into a portable bag, the device being provided with handle means.
